ACADEMIC DETAILS

Year	Degree/Exam	Institute	GPA/Marks(%)
2026 – Present	Master of Computer Applications	Graphic Era University, Dehradun	–
Jul 2023 – 2026	Bachelor of Computer Applications	Graphic Era University, Dehradun	7.60 / 10.0
Apr 2021 – Mar 2023	C.B.S.E (12th)	Colonel's Academy, Dehradun	64.0%
Apr 2019 – Mar 2021	C.B.S.E (10th)	Colonel's Academy, Dehradun	75.0%

PROJECTS

- **NuroTrack – AI Productivity Monitoring System** (2026) [GitHub Repository](#) (Python, Flask, Firebase, SQLite, Chart.js, Scikit-learn)
 - Developed an **AI-powered productivity monitoring system** that tracks real-time desktop activity and analyzes user behavior patterns.
 - Built a **Flask-based backend system** with REST APIs to manage activity tracking, productivity analytics, and report generation.
 - Integrated a **Machine Learning model using Gradient Boosting** to predict productivity scores (**NuroScore**) based on user activity data.
 - Designed an interactive **analytics dashboard** with productivity charts, app usage insights, daily reports, and task management features.
 - Implemented **Firebase Authentication** for secure login and user session management.
- **CyberShield – Network Threat Detection System** (2026) [GitHub](#) (Python, SQL, Scikit-learn, Flask)
 - Built a network threat detection system to analyse network activity and classify events as Normal or Suspicious.
 - Developed a Random Forest model using network traffic features for automated threat classification and risk analysis.
 - Implemented a Flask-based web dashboard for real-time threat analysis and security event monitoring.
 - Used SQL queries to analyse network logs and identify suspicious activity patterns for further investigation.
- **Telecom Customer Churn Analysis** (2026) [GitHub](#) (Python, SQL, Pandas, Scikit-learn, Matplotlib)
 - Analysed 7,043 telecom customer records to identify key factors influencing customer churn.
 - Performed EDA and SQL-based customer segmentation to uncover churn patterns across tenure, services, and payment methods.
 - Compared multiple Machine Learning models and selected **AdaBoost** based on the highest cross-validation ROC-AUC score of **0.8466**.

TECHNICAL SKILLS

- **Programming:** Python , SQL , Java , C++ , JavaScript
- **Data Analytics & ML:** Pandas , NumPy , Scikit-learn , Matplotlib , Data Cleaning , EDA , Data Visualization , Machine Learning
- **Web Development:** Flask , HTML , CSS , JavaScript , REST APIs
- **Databases:** MySQL , SQLite , MongoDB
- **Tools:** Git , GitHub , VS Code , Excel , Google Sheets

RELEVANT COURSEWORK

- Data Structures and Algorithms • Operating Systems • Database Management Systems • Computer Networks

CERTIFICATIONS

- **Java Course - Mastering the Fundamentals** – (March 2026)
- **Deloitte Data Analytics Job Simulation:** Deloitte (Forage) (May 2026) - Performed data analysis and dashboard creation .

ACHIEVEMENTS

Served as **Core Team Member** for a 24-hour Hackathon hosted by Co-Dev Club and Coding Ninjas.
